Bug in use case: provider esp translation

Description

1.Register as Rookie, Provider or Company TEST#4

The spanish translation regarding provider stuffs are not correct.

Result

The tester gruoup detected the bug.

“ Register as a company and rookie: It's behaving as expected.

Register as a provider all fields show “viva el liverpool” ”“

Bug in use case: hacking on Problem (cross scripting)

Description

16.Manage Problem TEST#3

Security @SafeHTML removed from the domain, now scripts injections are allowed in the problem form on the corresponding fields.

Results

The tester group detected the bug.

“Not showing the “Insecure HTML” the object has persisted.”

Bug in use case: Edit a position which is not mine

Description

17. Manage positions TEST#11

A Company now can hack by url the edition ofa position, retrieving sensible data in the form shown. THE findOneToEdit has been replaced by a findOne.

Results

The tester group detected the bug.

“The position of other company can be edited, deleted and changed from final mode to draft mode.”

Bug in use case: delete an item

Description

15.Manage Items TEST#8

The param “delete” in the post is wrong, so the delete is not expected to work.

Results

The tester group detected the bug.

“It doesn't work like it should, I can't eliminate an item.”

Bug in use case : Use case 23 (Dashboard)

Description

The standard deviation of the audit score of the positions stored in the system is not shown.

Results

The tester group detected the bug.

“The standard deviation of the audit score of the positions stored in the system is not show in English. Also, a lot of fields show in English when I navigate in Spanish.”

Bug in use case: create a curricula

Description

41.Manage Items TEST#2

GitHub profile and LinkedIn profile @NotBlank restriction has been deleted, so it doesn't show “Must be not blank”

Results

The tester group detected the bug.

“I had to complete github profile and linkedinProfile but it doesn't show "Must be not blank".”
